

Listing of the claims:

Claim 1 (currently amended): A method for a computer implemented scripting tool to create a script, the method comprising the steps of:

receiving a sequence of commands to perform;

receiving an indication of one of a plurality of scripting languages;

creating ~~outputting~~ a script in the indicated scripting language, the script containing the sequence of user-requested-commands: commands; and

outputting the script.

Claim 2 (original): A method according to claim 1 comprising the further step of:

executing each command in the sequence of commands prior to outputting the script.

Claim 3 (original): A method according to claim 2 comprising the further step of:

providing details of the response from execution of each command to a user.

Claim 4 (currently amended): A method according to claim 1 wherein the sequence of
commands are to be executed against a Universal Data Directory Interface (UDDI) registry.

Claims 5-10 (canceled)

Claim 11 (currently amended): A computer program product comprising a computer usable
medium having computer usable program code tangibly embodied therein, the computer usable
medium comprising: ~~comprising instructions which, when executed on a data processing host,~~
~~cause the data processing host to carry out a method comprising the steps:~~

computer readable program code configured to receive receiving a sequence of
commands to perform;

computer readable program code configured to receive receiving an indication of one of a
plurality of scripting languages;

computer readable program code configured to create outputting a script in the indicated
scripting language, the script containing the sequence of user-requested ~~commands; commands;~~
and

computer readable program code configured to output the script.

Claim 12 (currently amended): A computer program product according to claim 11 further comprising computer readable program code configured to execute wherein the method comprises the further step of: ~~executing~~ each command in the sequence of commands prior to outputting the script.

Claim 13 (currently amended): A computer program product according to claim 12 further comprising computer readable program code configured to provide wherein the method comprises the further step of: ~~providing~~ details of the response from execution of each command to a user.

Claim 14 (currently amended): A computer program product according to claim 11 wherein the sequence of commands are to be executed against a Universal Data Directory Interface (UDDI) registry.

Claim 15 (canceled)
